

AI FOCUSED FULL STACK DEVELOPER · APPLICATION TO CENTRICAL

Full-stack engineer who ships AI products end to end: LLM apps, MCP servers, agent tooling, and the TypeScript systems around them. Central just wired its platform into Claude and ChatGPT over MCP; that surface is my daily work.

- Tel Aviv, Israel

The pitch in one line: your June launch (three MCP servers, AI Role-Play Simulations, a CLI on the roadmap) is the exact artifact list I build and publish.

EXPERIENCE

- Software Developer · Joomsy2025 - present
- Early-stage startup, team of five. Primary developer with full-stack and DevOps ownership; significant responsibility across engineering and product.
- AI Builder · Independent2026 - present
- Independent practice shipping MVPs from brief to deploy in hours-to-days: web apps, landing pages, and a production video-rendering pipeline.
- Customer Support Engineer · Wochit2021 - present
- Technical support at scale for a cloud video editor; feeding real user failures back into the product with the development teams.

SELECTED WORK (ALL LIVE, ALL OPENABLE)

- MDPMCP server · npm
- A Markdown compiler built for AI agents to write into, shipped with its own MCP server so Claude drives it directly. Zero-dependency Node engine. [barmoshe.github.io/mdp](#)
- EntailerLLM + evals · npm
- A logic linter: an LLM formalizes claims, a deterministic core validates them. Built to kill false positives. [barmoshe.github.io/entailer](#)
- Temporal Data ServiceFeatured by Temporal
- Cross-language durable workflows: Go, Python, and TypeScript workers under one orchestration, featured on Temporal's Code Exchange.
- bar for companiesAutomation · Next.js
- A data-driven gallery of bespoke pitch sites, each rebuilt in a different company's brand, with automated logo and screenshot pipelines. [bar-for-companies.vercel.app](#)

MAPPED TO YOUR POSTING

- LLM, HANDS-ON
- Prompt design, orchestration, and evals in shipped products, on Anthropic and OpenAI models.
- MCP & AGENTS
- MCP servers published to npm; Claude Code plugins and agent harnesses as open source.
- FULL STACK TYPESCRIPT
- React + Node.js daily (the alternatives your posting names), REST APIs, SQL, product-grade UI. C# from my degree.
- CLOUD & DEVOPS
- AWS, Docker, Kubernetes, Terraform (hands-on Wix workshop), GitHub Actions CI/CD as routine.

EDUCATION

- B.Sc. Computer Science
- Afeka College of Engineering, 2020–2023. From low-level assembly up to .NET, operating systems, data structures, algorithms.
- DevOps Workshop · Wix Tel Aviv
- Amazon EKS, Kubernetes, Terraform, microservices; scalable cloud deploys.
- Full-Stack Bootcamp · Coding Academy
- Intensive Node.js, React, MongoDB track for experienced coders.
